INDEX TO VOLUME XXVI

Actinobacillus, The systematic relationships of 221
Aerobacter and escherichia, The fermentation of sodium malonate as a means of differentiating 329
Agar-digesting bacteria. Studies of 435
Almon, Lois and Baldwin, I. L. The stability of cultures of Rhizobium 229
Anaerobic bacteria, An improved method of obtaining surface colonies of 471
—— organisms, The use of reduced iron for the cultivation of 1
Antisera, The reaction of, for *B. actinoides* 321
Application of statistics to problems in bacteriology. II. A consideration of the accuracy of dilution data obtained by using a single dilution 331
—— —— —— —— —— —— ——. III. A consideration of the accuracy of dilution data obtained by using several dilutions 559
Asbestos, The use of shredded, in methane fermentations 379

B. actinoides, The reaction of antisera for 321
Bacillus cereus, Behavior of. The effect of the reaction of the medium on the characteristics of bacteria. III 57
Bacillus coli-communior, *Salmonella enteritidis* and *Pseudomonas pyocyanea*, General presentation of the problem, and results obtained with. The effect of the reaction of the medium on the characteristics of bacteria .. 9
—— *megatherium*, Morphological and cultural studies of, with special reference to dissociation 623
—— *subtilis*, Behavior of. The effect of the reaction of the medium on the characteristics of bacteria. II 37
Bacteria, anaerobic, An improved method of obtaining surface colonies of 471
——, A systematic study of the fusiform 599
Bacteria, The effect of the reaction of the medium on the characteristics of. I. General presentation of the problem, and results obtained with *Bacillus coli-communior*, *Salmonella enteritidis* and *Pseudomonas pyocyanea* 9
——, The effect of the reaction of the medium on the characteristics of. II. Behavior of *Bacillus subtilis* 37
——, The effect of the reaction of the medium on the characteristics of. III. Behavior of *Bacillus cereus* 57
——, encapsulated, Dissociation of 521
——, Studies of agar-digesting 435
——, The gender of generic names of 569
——, The Gram reaction and the electric charge of 211
——, The nature of the effect of CO_2, under pressure upon 201
——, The propionic acid. II. Classification 393
——, The utilization of certain sugars and their derivatives by 475

Bacterial growth, Limitation of, at higher temperatures..... 77
—— variation, with special reference to pleomorphism and filtrability..... 289
Bacteriology, Application of statistics to problems in. II. A consideration of the accuracy of dilution data obtained by using a single dilution.... 331
——, Application of statistics to problems in. III. A consideration of the accuracy of dilution data obtained by using several dilutions..... 559
Bacteriostatic, The, action of gentian violet and dependence on the oxidation-reduction potential..... 573
Bacterium dysenteriae, Sonne, A study of some of the factors promoting dissociation..... 489
Baldwin, I. L. and Almon, Lois. The stability of cultures of Rhizobium..... 229
Berry, J. A. Destruction and survival of microörganisms in frozen pack foods..... 459
Brandly, Carl A. and Scott, Joseph P. The use of reduced iron for the cultivation of anaerobic organisms..... 1
Breden, C. R. and Buswell, A. M. The use of shredded asbestos in methane fermentations..... 379
Brown, Russell W. and Werkman, C. H. The propionic acid bacteria. II. Classification..... 393
Bruner, D. W. Differentiation between Gram-positive and Gram-negative microörganisms by the use of enzymes..... 361
Bryan, C. S. and Fabian, F. W. The influence of cations on aerobic sporogenesis in a liquid medium..... 543
Burke, Victor and Gibson, Fred O. The Gram reaction and the electric charge of bacteria..... 211
Buswell, A. M. and Breden, C. R. The use of shredded asbestos in methane fermentation..... 379

Casman, E. P. and Rettger, Leo F. Limitation of bacterial growth at higher temperatures..... 77
Cations, The influence of, on aerobic sporogenesis in a liquid medium..... 543
Chromogenic asporogenous yeast, A study of variation in a..... 125
CO_2, The nature of the effect of, under pressure upon bacteria..... 201

Destruction and survival of microörganisms in frozen pack foods..... 459
Development and control of microörganisms in a pulp and paper mill system.. 373
Device, A, to facilitate and accelerate the uniform distribution of inoculum over the surface of poured plates..... 539
Dienst, Robert B. A study of some of the factors promoting dissociation of *Bacterium dysenteriae*, Sonne..... 489
Differentiation between Gram-positive and Gram-negative microörganisms by the use of enzymes..... 361
Dilution data, A consideration of the accuracy of, obtained by using a single dilution. Application of statistics to problems in bacteriology. II..... 331
—— ——, A consideration of the accuracy of, obtained by using several dilutions. Application of statistics to problems in bacteriology. III... 559
Dissociation, A study of some of the factors promoting, of *Bacterium dysenteriae*, Sonne..... 489

Dissociation, Morphological and cultural studies of *Bacillus megatherium* with special reference to 623
—— of encapsulated bacteria 521

Effect, The, of the reaction of the medium on the characteristics of bacteria. I. General presentation of the problem, and results obtained with *Bacillus coli-communior*, *Salmonella enteritidis* and *Pseudomonas pyocyanea* 9
——, The, of the reaction of the medium on the characteristics of bacteria. II. Behavior of *Bacillus subtilis* 37
——, The, of the reaction of the medium on the characteristics of bacteria. III. Behavior of *Bacillus cereus* 57
Eijkman medium, A modified 419
Electric charge of bacteria, The Gram reaction and the 211
Enzymes, Differentiation between Gram-positive and Gram-negative microorganisms by the use of 361
Ergosterol, Sensitization by. Studies on the solubility of pneumococcus in saponin. II 215
Erysipelas, A study of variation in hemolytic streptococci from scarlet fever and. Preliminary report 505
Escherichia, The fermentation of sodium malonate as a means of differentiating aerobacter and 329

Fabian, F. W. and Bryan, C. S. The influence of cations on aerobic sporogenesis in a liquid medium 543
Fermentation, The, of sodium malonate as a means of differentiating aerobacter and escherichia 329
Foods, frozen pack, Destruction and survival of microörganisms in 459
Foodstuffs, The influence of, upon the respiratory metabolism and growth of human tubercle bacilli 139
Fusiform bacteria, A systematic study of the 599

Gaseous, The, metabolism of *L. pentoaceticus* with reference to several representative members of the Lactobacillus group 341
Gender, The, of generic names of bacteria 569
Generic names of bacteria, the gender of 569
Gentian violet, The bacteriostatic action of, and dependence on the oxidation-reduction potential 573
Gibson, Fred O. and Burke, Victor. The Gram reaction and the electric charge of bacteria 211
Gillespie, Hazel B. and Rettger, Leo F. Bacterial variation, with special reference to pleomorphism and filtrability 289
Goresline, Harry E. Studies of agar-digesting bacteria 435
Gorham, Frederic Poole. 1871–1933 431
Gram-negative microörganisms, Differentiation between Gram-positive and, by the use of enzymes 361
Gram-positive and Gram-negative microörganisms, Differentiation between, by the use of enzymes 361
Gram reaction, The, and the electric charge of bacteria 211

Hajna, A. A. and Perry, C. A. A modified Eijkman medium..... 419
Halvorson, H. O. and Ziegler, N. R. Application of statistics to problems in bacteriology. II. A consideration of the accuracy of dilution data obtained by using a single dilution..... 331
—— and ——. Application of statistics to problems in bacteriology. III. A consideration of the accuracy of dilution data obtained by using several dilutions..... 559
Hemolytic streptococci, A study of variation in, from scarlet fever and erysipelas. Preliminary report..... 505
Henrici, Arthur T. and Punkari, Laila. A study of variation in a chromogenic asporogenous yeast..... 125
Hunt, George A. The gaseous metabolism of *L. pentoaceticus* with reference to several representative members of the Lactobacillus group..... 341

Improved, An, method of obtaining surface colonies of anaerobic bacteria.... 471
Influence, The, of cations on aerobic sporogenesis in a liquid medium..... 543
——, The, of adverse conditions upon the respiratory metabolism and growth of human tubercle bacilli..... 167
——, The, of foodstuffs upon the respiratory metabolism and growth of human tubercle bacilli..... 139
Ingraham, Mary A. The bacteriostatic action of gentian violet and dependence on the oxidation-reduction potential..... 573
Inoculum, A device to facilitate and accelerate the uniform distribution of, over the surface of poured plates..... 539
Iron, The use of reduced, for the cultivation of anaerobic organisms..... 1

Jahn, T. L. and Richards, Oscar W. A photoelectric nephelometer for estimating the population density of microörganisms..... 385

Klein, Sidney J. Studies on the solubility of pneumococcus in saponin. II. Sensitization by ergosterol..... 215
Knaysi, Georges. Morphological and cultural studies of *Bacillus megatherium* with special reference to dissociation..... 623
Koser, Stewart A. and Saunders, Felix. The utilization of certain sugars and their derivatives by bacteria..... 475

L. pentoaceticus, The gaseous metabolism of, with reference to several representative members of the Lactobacillus group..... 341
Lactobacillus group, The gaseous metabolism of *L. pentoaceticus* with reference to several representative members of the..... 341
Leifson, Einar. The fermentation of sodium malonate as a means of differentiating aerobacter and escherichia..... 329
Lewis, I. M. and Swearingen, Judson S. The nature of the effect of CO_2 under pressure upon bacteria..... 201
Limitation of bacterial growth at higher temperatures..... 77
Liquid medium, The influence of cations on aerobic sporogenesis in a..... 543

Loebel, R. O., Shorr, E. and Richardson, H. B. The influence of adverse conditions upon the respiratory metabolism and the growth of tubercle bacilli 167
——, —— and ——. The influence of foodstuffs upon the respiratory metabolism and growth of human tubercle bacilli 139

Metabolism, The gaseous, of *L. pentoaceticus* with reference to several representative members of the Lactobacillus group 341
Methane fermentations, The use of shredded asbestos in 379
Microörganisms, A photoelectric nephelometer for estimating the population density of 385
——, Development and control of, in a pulp and paper mill system 373
—— in frozen pack foods, Destruction and survival of 459
Micrurgical technique, Studies in 251
Modified, A, Eijkman medium 419
Morphological and cultural studies of *Bacillus megatherium* with special reference to dissociation 623

Nature, The, of the effect of CO_2 under pressure upon bacteria 201
Nelson, John B. The reaction of antisera for *B. actinoides* 321
Nephelometer, A photoelectric, for estimating the population density of microörganisms 385

O'Neal, Hazel E. Dissociation of encapsulated bacteria 521
Oxidation-reduction potential, The bacteriostatic action of gentian violet and dependence on the 573

Perry, C. A. and Hajna, A. A. A modified Eijkman medium 419
Photoelectric, A, nephelometer for estimating the population density of microörganisms 385
Pleomorphism and filtrability, Bacterial variation, with special reference to ... 289
Pneumococcus, Studies on the solubility of in saponin. II. Sensitization by ergosterol 215
Population density of microörganisms, A photoelectric nephelometer for estimating the 385
Poured plates, A device to facilitate and accelerate the uniform distribution of inoculum over the surface of 539
Propionic, The, acid bacteria. II. Classification 393
Pseudomonas pyocyanea, General presentation of the problem, and results obtained with *Bacillus coli-communior*, *Salmonella enteritidis* and. The effect of the reaction of the medium on the characteristics of bacteria. I ... 9
Pulp and paper mill system, Development and control of microörganisms in a ... 373
Punkari, Laila and Henrici, Arthur T. A study of variation in a chromogenic asporogenous yeast 125

Reaction, The, of antisera for *B. actinoides* 321
Reeves, James R. An improved method of obtaining surface colonies of anaerobic bacteria 471

Respiratory metabolism and growth of human tubercle bacilli, The influence of foodstuffs upon the..... 139
Respiratory metabolism, The influence of adverse conditions upon the, and growth of human tubercle bacilli..... 167
Rettger, Leo F. and Casman, E. P. Limitation of bacterial growth at higher temperatures..... 77
—— and Gillespie, Hazel B. Bacterial variation, with special reference to pleomorphism and filtrability..... 289
—— and Slanetz, Lawrence W. A systematic study of the fusiform bacteria.. 599
Reyniers, J. Arthur. Studies in micrurgical technique..... 251
Rhizobium, The stability of cultures of..... 227
Richards, Oscar W. and Jahn, T. L. A photoelectric nephelometer for estimating the population density of microörganisms..... 385
Richardson, H. B., Loebel, R. O. and Shorr, E. The influence of adverse conditions upon the respiratory metabolism and growth of human tubercle bacilli..... 167
——, —— and ——. The influence of foodstuffs upon the respiratory metabolism and growth of human tubercle bacilli..... 139
Round, Lester A. Frederic Poole Gorham, 1871–1933..... 431

Salmonella enteritidis and *Pseudomonas pyocyanea*, General presentation of the problem, and results obtained with *Bacillus coli-communior*. The effect of the reaction of the medium on the characteristics of bacteria. I..... 9
Sanborn, J. R. Development and control of microörganisms in a pulp and paper mill system..... 373
Saponin, Studies on the solubility of pneumococcus in. II. Sensitization by ergosterol..... 215
Saunders, Felix and Koser, Stewart A. The utilization of certain sugars and their derivatives by bacteria..... 475
Scarlet fever and erysipelas, A study of variation in hemolytic streptococci from. Preliminary report..... 505
Scott, Joseph P. and Brandly, Carl A. The use of reduced iron for the cultivation of anaerobic organisms..... 1
Shorr, E., Loebel, R. O. and Richardson, H. B. The influence of adverse conditions upon the respiratory metabolism and growth of human tubercle bacilli..... 167
——, —— and ——. The influence of foodstuffs upon the respiratory metabolism and growth of human tubercle bacilli..... 139
Slanetz, Lawrence W. and Rettger, Leo F. A systematic study of the fusiform bacteria..... 599
Sodium malonate, The fermentation of, as a means of differentiating aerobacter and escherichia..... 329
Spicer, Sophie. A study of variation in hemolytic streptococci from scarlet fever and erysipelas. Preliminary report..... 505
Sporogenesis, Aerobic, The influence of cations on, in a liquid medium..... 543
Stability, The, of cultures of Rhizobium..... 229

Statistics, Application of, to problems in bacteriology. II. A consideration of the accuracy of dilution data obtained by using a single dilution.... 331
——, Application of, to problems in bacteriology. III. A consideration of the accuracy of dilution data obtained by using several dilutions..... 559
Stearn, Allen E. and Stearn, Esther Wagner. See Stearn, Esther Wagner, and Stearn, Allen E.
Stearn, Esther Wagner and Stearn, Allen E. The effect of the reaction of the medium on the characteristics of bacteria. I. General presentation of the problem, and results obtained with *Bacillus coli-communior*, *Salmonella enteritidis* and *Pseudomonas pyocyanea*..... 9
—— and ——. The effect of the reaction of the medium on the characteristics of bacteria. II. Behavior of *Bacillus subtilis*..... 37
—— and ——. The effect of the reaction of the medium on the characteristics of bacteria. III. Behavior of *Bacillus cereus*..... 57
Studies in micrurgical technique..... 251
—— on the solubility of pneumococcus in saponin. II. Sensitization by ergosterol..... 215
Study, A, of some of the factors promoting dissociation of *Bacterium dysenteriae*, Sonne..... 489
——, ——, of variation in a chromogenic asporogenous yeast..... 125
——, ——, of variation in hemolytic streptococci from scarlet fever and erysipelas. Preliminary report..... 505
Sugars, The utilization of certain, and their derivatives by bacteria..... 475
Swearingen, Judson S. and Lewis, I. M. The nature of the effect of CO_2 under pressure upon bacteria..... 201
Systematic, A, study of the fusiform bacteria..... 599
——, The, relationships of Actinobacillus..... 221

Thompson, Luther. The systematic relationships of actinobacillus..... 215
Thompson, Redvers. A device to facilitate and accelerate the uniform distribution of inoculum over the surface of poured plates..... 539
Tubercle bacilli, human, The influence of adverse conditions upon the respiratory metabolism and growth of..... 167
—— ——, ——, The influence of foodstuffs upon the respiratory metabolism and growth of..... 139

Use, The, of reduced iron for the cultivation of anaerobic organisms..... 1
——, ——, of shredded asbestos in methane fermentations..... 379
Utilization, The, of certain sugars and their derivatives by bacteria..... 475

VanEseltine, G. P. The gender of generic names of bacteria..... 569
Variation, A study of, in a chromogenic asporogenous yeast..... 125

Werkman, C. H. and Brown, Russell W. The propionic acid bacteria. II. Classification..... 393

Yeast, Chromogenic asporogenous, A study of variation in a..... 125

Ziegler, N. R. and Halvorson, H. O. Application of statistics to problems in bacteriology. II. A consideration of the accuracy of dilution data obtained by using a single dilution..... 331
—— and ——. Application of statistics to problems in bacteriology. III. A consideration of the accuracy of dilution data obtained by using several dilutions..... 559
